#### PUMPS IN EGYPT.

TO THE BOTTOR OF THE BOTFILAN GARRITE.

Sir.—My attention has just been called to a letter in your issue of May 8, on "Pampis in Egypt.", signed by F. Allen, director of Messra. Allen, Alderson & Co. The only possible explanation for the interduction in this jetter of the name of J. and H. Owynne and Gwynne & Co. is to lead your readens to assume that Messra. Allen, Alderson & Co. had given up at their own desire the ageories of these two firms, now "offshinded and known as Gwynnes, Limited. This, blowever, was very far from being the case." The firm of Allen Alderson was originally started in 1868 by Mr. S aiffred S. Allen & Co., with J. and H. Gwynne and Kausones, Sinns, and Heads agent, at that time holding the sear. The holding the sear of the agreement. In the terms of the agreement in the terms of the agreement in 1872 paid a visit to Egypt and the search of the agreement in lead of the forth of the subject, or to the subsequent reason for Messra. Gwynne & Co. discontinuing their agency. I wish to call your attention, however, to one two misleading statements in Mr. Allen's letter.

I challenge Mr. Allen to prove-thateny of the pumping installations made either by his pringiple of by Congingental jegiginess, have given better results on the same lifts and under similar conditions, to those manufactored by my company and I have no doubt that I can arrange for as risky sets and sizes as Mr. Allen can name to be tested by independent experts with the "machinery" that he is prepared to champion.

#### MALARIA IN ITALY.

MALARIA IN ITALY.

An interesting report has been issued at Rome on the work accomplished during llast year by the Red Gross Society in the Roman Campagna in combating the malaria. The society has seven stations in the Campagna, and its methods are very systematic. The campagna in combating the malaria of the control of the part round and those who only come down to the plain from the mounts for a certain assoon of the year. A further classification divides the permanent and temporary population of this vest district into those who are ossisteder dimunus from malaria and those who are liable to it. Those latter receive from the society five to six tabloids of quinies a day for a week, and then one to two tabloids allay soconting to their age; the former one to the control of the control of
