A Cairo contemporary remarked yeaterday—Une vertisive fonotion rigne en ville à la suite de deux décès aurrenns à la suite de versione de la consistence de la suite de versione de la consistence de vaccination, deux ont en une issue fatala. It is sincerely to be hoped that a satisfactory explanation of these cases will be discovered, as if it is found that the deaths ensued cod, as if it is found that the deaths ensued vowing to the reason given above, a serious setback might be given to the progress of vaccination in Egypt. During last year 408,891 succeedly accordation was progress in vaccinating were checked owing to the alarm arising from the fatality in Causal progress in vaccinating were checked owing to the alarm arising from the fatality in Causal Poor which were the constant of the constant of the progress of vaccination in Egypt is very great por which were the constant of the progress of vaccination and the progress of vaccination of the progress appears to be due to want of vaccination on the part. Many of the Greek patients were treated at the hospital for indictions diseases, and it is reported that those who contracted the disease severely and ded had never been avocinated.

The vaccine produced at the Cairo Vaccine Institute has up to now given very satisfactory results. There were no less than 4,155 cases of small-pox, of which S5 terminated fatally, in Egypt last year.
